## SUMMARY

A diligent software developer with 2 years of commercial experience and a keen eye for UI design. I specialise in the use of React, JS ES6 and CSS, having produced outputs for some of the UK's most renowned highstreet brands. I'm a strong problem-solver with a robust record for improving a company's codebase for reusability. I'm accustomed to a fast-paced working environment, having released 40+ outputs in the past year. A team-player, I've got experience using version control systems and communicating in both technical and non-technical settings.
